

2013

Koza Altın İşletmeleri A. Ş.

Operational Report & Financials

30 JUNE 2013

Our Strategy

Our goal is to develop our portfolio of existing gold assets and find, develop and selectively acquire gold projects in Turkey to grow our resource base and maximise profitable production.

This goal aims to capitalize on our position as the leading gold producer in Turkey, our hub operating strategy and our track record of successfully growing resources and production.

We also seek to provide leadership in safety, stewardship

of the environment, including responsible rehabilitation of the completed areas, and social responsibility to local communities.

Koza Gold is a leading Turkish gold mining company with a track record of sustained profitability underpinned by low costs. We produced 154 koz of gold in the first six months of 2013 and generated revenues of TL 411.8 million.

Our Performance

2013 Jan-Jun

2012 Jan-Jun

Production	154 koz of gold (5.74g/t) 76 koz of silver (4.30g/t)	185 koz of gold (6.75g/t) 76 koz of silver (4.07g/t)
Cash Costs	\$487/oz	\$339/oz
Revenue	TL 411.8 million	TL 556.9 million
EBITDA	TL 270.2 million	TL 431.7 million
EBIT	TL 224.5 million	TL 397.1 million

About Us

A leading Turkish Gold producer

We are a leading Turkish gold mining company based on our gold production of approximately 153.836 ounces in the first six months of 2013. As at 30 June 2013, we had 52 operating licenses and 411 exploration licenses throughout Turkey in the Aegean and Marmara regions, the Black Sea region and Central and Eastern Anatolia.

We currently own six operating mines: an underground mine at Ovacık, a mine at Mastra where we utilise both underground and open pit mining methods, a mine in Çukuralan where we utilise both underground and open pit mining methods, an open pit mine at Kaymaz. Open pit production at Söğüt and Çoraklıktepe has started in the first quarter of 2013. Himmetdede construction is expected to be finished on 4th quarter 2013.

We have a feasibility stage project, Mollakara, located near Ağrı in the north-east of Turkey. In addition, our properties also include 14 exploration projects in Turkey, ranging from early-stage to advanced exploration prospects with resource estimations completed in 2012. At most of our exploration prospects, mapping and sampling programmes are ongoing or completed and drilling and geophysical surveys have already commenced or are planned for 2012. Additionally, we have identified several target exploration sites where the nature of the mineralised deposits suggests that there is potential for resource development.

Exposure to the gold price and gold fundamentals

Substantially all of our revenues are generated from the production and sale of gold, and as a result our financial performance is, and will continue to be, influenced by the market price of gold. Between 1 January 2013 and 30 June 2013, the price of gold as quoted on the London Bullion Market ranged between a low of \$1.192,00 and a high of \$1.693,75 per ounce, based on the P.M. fixing price.

We are a leading Turkish gold mining company

We are a leading Turkish gold mining company producing approximately 153.836 ounces of gold in the first six months of 2013. Turkey has a rich mining history which dates back thousands of years and today is one of the few underexplored developed countries in the world. According to SRK, as of 2006 Turkey’s gold endowment was estimated at 31.5 million ounces of gold contained in 51 deposits. SRK believes that there is promising potential for green field exploration in Turkey because over half of the known gold resources in Turkey are in relatively recent discoveries. “As of 2006, Turkey’s gold endowment was estimated at 31.5moz gold contained in 51 deposits ... Since over half of the known gold resources in Turkey are in recent discoveries, there is great potential for greenfield exploration within Turkey.” (SRK)

Sector

Changes in mining law Turkey, increasing gold price trend and developments in technology have led to the increase in gold potential in Turkey. Studies indicate that there are approximately 6500 tones of gold in Turkey. (Resource: Turkey’s Gold Potential and Mining Resources Cutting Methods, Ayhan Erler, METU, Geology Department,1997) Only 10% of this, which is 650 tones, is classified as reserves. Therefore, when market’s current situation is examined, it is seen that priority is given to gold exploration. “As per previous procedure, exploration license was to be issued for 3 years and extended for 2 years. It was required that this license was then to be changed to operational license. Under the new legal arrangements, total exploration period has been increased to 7 years. It covers 1 year for pre-exploration, 2 years for general exploration and 4 years for detailed exploration respectively.”

With foregoing reasons, the competition in this sector has intensified on exploration activities. Koza Gold has been pursuing these two activities in parallel. In next three years, competition will be from domestic and foreign companies and intensify at West Anatolia. In the production areas, competition is expected to be from Eldorado (Tuprag, which is currently in production and Anatolia minerals (Alacer Gold, Cukurdere), currently in permitting stage. Domestic companies who are involved in exploration activities are thought to be starting production at later stages. Despite 6,500 tonnes of gold potential and 650 tonnes of reserves, Turkey only produces between 10 and 20 tonnes of gold and 250 -300 tonnes of gold need to be imported to meet the demand.

Company

Koza Gold Operations Company is a Turkish company formed by 100% Turkish capital to explore and operate gold mines in our country. ATP Construction and Trade A.Ş. and Koza-Ipek Holding A.Ş. have acquired all the shares of from Normandy Mining A.Ş. and Newmont Mining Corporation Limited in 3 March 2005 thus becoming first Turkish company in the history of Republic of Turkey to realize gold production in this country. Company’s Ovacik Gold Mine situated at Bergama, Izmir has been a key factor in turning the country’s big gold potential into economical gain and it is the first gold mine operated in the Republic of Turkey.

TURKEY GOLD PRODUCTION (TONNES)

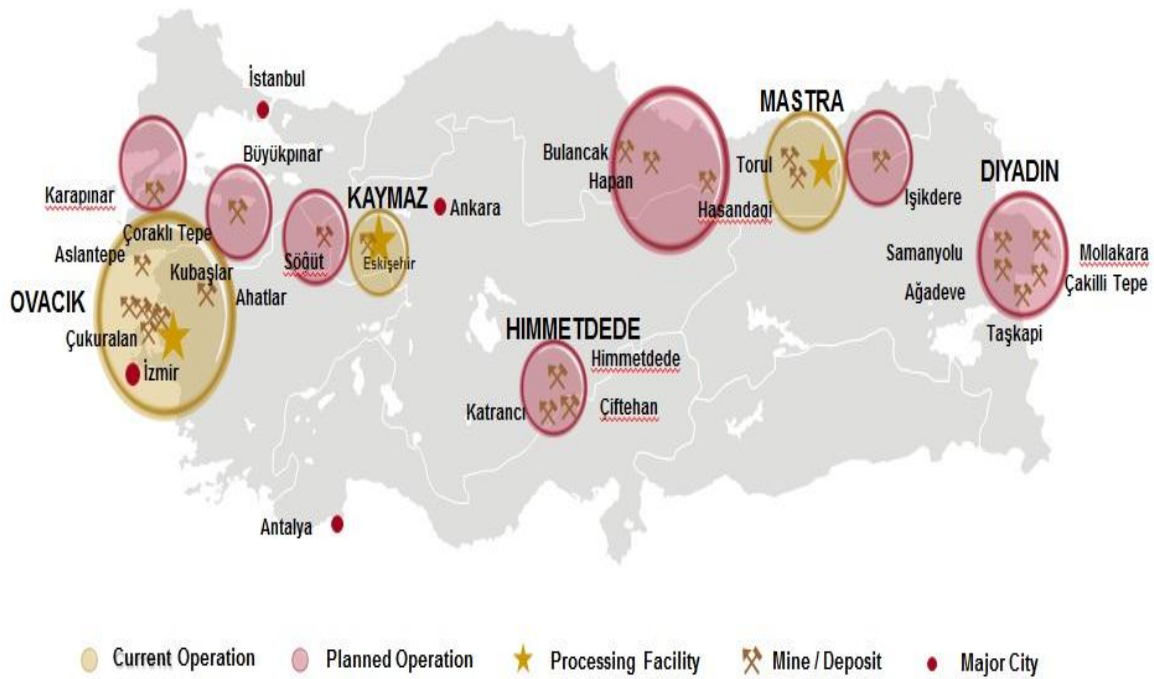

We have a track record of growing production, reserves and resources

We have demonstrated an overall trend of growing production levels since our inception in 2005, and we believe that our mines, development projects and exploration prospects provide significant potential for continued growth. In 2005, we successfully restarted ore production at the Ovacık mine after acquiring it. We developed and brought into full production the Kucukdere mine in 2006, the Mastra mine in 2008, the Gıcık mine in 2009, Çukuralan mine in 2010 and Kaymaz mine in 2011. Kaymaz open pit facilities, which has 511,000 ounces of gold reserves, commenced the production in March 2011. As shown from the figure below, our gold production came from Ovacık between 2006 and 2008, Ovacık and Mastra between 2009-2010 and Ovacık, Mastra and Kaymaz from 2011 and 2012. Since March 2005, we have successfully increased both our reserve and resource base as a result of acquisitions, exploration activities and the increase in gold prices. As at 31 December 2012, our total measured, indicated and inferred resource base had increased to 12,6 million ounces of gold from 1.8 million ounces, and our total proven and probable reserve base had increased to 3,72 million ounces of gold from 0,4 million ounces. As of 31 December 2007, 30 September 2009, 31 December 2010, 31 December 2011 and 31 December 2012, all of our reserves and resources were audited by SRK. It is planned to have an audit by SRK for the reserves and resources as of 31 December 2013.

Our business model focuses on a regional hub strategy to maximise profitable production.

We are pursuing a strategy of using our processing facilities as hubs to process ore from regional deposits. We expect that this centralised processing will minimise our capital expenditure requirements, enabling us to develop relatively smaller deposits in each hub area that are high grade but not of sufficiently large scale to justify the construction of dedicated processing facilities. Our first application of this business model has been the development of the Ovacık hub and the Küçükdere deposit, located 80 km by road from the Ovacık processing plant. We plan to replicate this model for other deposits located in the vicinity of Ovacık, such as Çoraklık Tepe. In addition, we established a second processing hub at Mastra in 2009, third processing plant at Kaymaz in 2011. Our fourth process plant construction, Himmetdede, has started in 4th quarter of 2012. Construction is expected to be finished in 4th quarter of 2013.

Cash costs

Our unit cash costs derived from our accounts for the first six months of 2013 and the first six months of 2012 amounted to 880 TL (\$487) and 607 TL (\$339) respectively. Compared to the previous year, the reason of this increase is mainly because of the temporary decrease of the average processed gold grade at Ovacik and Mastra process plants and escalation of the cost elements due to inflation.

Turkey Highly Prospective: We have a significant pipeline of development and exploration assets in Turkey

We believe that our growth opportunities include the expansion of existing operations through discovery of additional resources adjacent to currently delineated deposits as well as the development of our pipeline of projects and greenfield exploration.

/

Health and Safety

We are committed to the highest standards of safety and continuously seek to develop, improve and implement new safety programmes and procedures to protect the safety of our employees. We continuously improve the safety of our working conditions by implementing practices such as monthly workplace inspections and weekly safety committee meetings. We regularly conduct safety audits and assessment programmes to ensure the adequacy of our health and safety policies. We also strive to improve our employees' response to emergencies by maintaining an underground and a mine rescue team for each site. For example, at Ovacık and Çukuralan, we have two emergency response teams comprising of 11 and 10 employees respectively, and a mine rescue team comprising of 15 employees at Ovacık-Çukuralan sites. We believe we are currently in material compliance with all health and safety regulations. We pay specific attention to include in our subcontractor agreements clauses regarding health and safety measures and guidelines that are required to be followed by the contracting parties.

Environment

Our environmental department is responsible for filing EIA reports with the MEF and ensuring that our operations comply with all applicable environmental laws and regulations.

The MEF considers several categories of environmental factors and compares the projected impact of the proposed mining activities to previously set environmental thresholds.

We ensure that our employees and contractors understand and comply with our environmental policies and management plans as well as our high level of commitment to environmental management. Our Environment Department at the same time has been providing training program since March 2007 on environmental awareness to all employees and as well as on environmental policies and implementations for newly recruited personnel at the mine site.

We have timely made all required emissions payments in full and have not faced any fines or penalties.

According to the Competent Person's Report, in the seven years since the mining of ore began at Ovack, no claims have been made against us by any governmental entity in respect of environmental non-compliances. We believe that we are in material compliance with all relevant environmental laws and regulations.

Board & Management Structure

Board of Directors

Hamdi Akın İpek	Chairman
Cafer Tekin İpek	Vice Chairman

Management

İsmet Sivriođlu

General Manager

Chemical Engineer with more than 40 years of experience in several production plants and management positions. Between 1970 and 1983, Mr.Sivriođlu worked at the sulphuric acid, borax, asitboric and perborate plants of Etibank where he held numerous positions, including, as shift engineer, chief engineer and assistant general manager, technical. In 1984, he was appointed the general manager of Kütahya Silver Mine where he worked until 1994, supervising the plant's construction, commissioning and operational stages. He was promoted to Etibank Corporate and served as its assistant general manager between 1994 and 1998. During this time he also served as the chairman of the Board of Directors of Çayeli Copper Operations Inc. He served as the advisor to the Minister of State during 1997 and 1998. He joined Koza Gold in 1999 as the General Manager for community relations and government relations. Since 2005 he served as the General Manager of Koza Gold.

Zafer Kara

Assistant General Manager, Technical

He has served as Assistant General Manager responsible for Mining and Geology since march 2007, but has worked for all of our predecessor entities since 1988. He has more than 20 years of mining experience, including from Newmont and Normandy, as a mine and exploration geologist. Additionally, he has been involved in exploration projects in Iran, Kazakhstan, Ghana and Australia. He is a member of Australian Institute of Geoscientists.

Özlem Özdemir

Assistant General Manager, Finance and Commercial

She has Bachelor's degree in Business Administration and serves the Company as CFO since 2007. She has worked for all of the predecessor entities since 1996. She served Newmont as the Financial Controller being responsible for

the preparation of the budgets, forecasts and financial reports in accordance with US GAAP and Turkish Accounting Standards.

Hayrettin Öđüt

Assistant General Manager, Administration

He serves as Assistant General Manager of human resources, public relations and administration. Between 1993 and 2005, he worked for Newmont and Normandy as their respective public relations manager. He obtained a B.Sc. degree in Chemistry.

Cemalettin Çetin

Assistant General Manager, Security

He serves as the Assistant General Manager in charge of security. He has held various management positions in the public and private sectors. He has held senior management positions at İpek since 2001. He obtained a Bachelor's degree in Mechanics.

Okan Bayrak

Assistant General Manager, Investor Relations

Okan Bayrak, an Assistant General Manager in charge of Investor Relations in our Company has graduated from the Department of Economics of Middle East Technical University in 1995. He joined the Capital Market Board as an Expert in the same year. He has held an office as an Expert at CMB Corporate Finance Department in May 1999. Between 2002 - 2003, he has participated in the training programs covering US stock exchange arrangements, financial institutions and capital markets at the Wharton School of the University of Pennsylvania. On December, 2007, he started to work as a Deputy Head at the Department of Capital Market Board.

Okan Bayrak joined Koza Gold Operations as an Assistant General Manager in May 2010.

Financial Review

- 154 koz of production in the first six months of 2013 lowered by 16.7% when compared to 185 koz in the first six months of 2012. There is 7 koz of gold available for sale in our stock as of 30 June 2013.
- TL 411.8 million of revenue in the first six months of 2013 lowered by 26.1% when compared to TL 556.9 million in the first six months of 2012.
- TL 224.5 million of EBIT in the first six months of 2013 lowered by 43.4% when compared to TL 397.1 million in the first six months of 2012.

Production

We are a leading Turkish Gold Mining Company based on gold production of approximately 153.836 ounces in the first six months of 2013. As at June 30, 2013 we had 52 operating licences and 411 exploration licences throughout Turkey.

We currently have three processing plants. Our first processing plant at Ovacık has been operating since 2001. The plant is currently processing 900,000 tpa. In the first six months of 2013 we produced 64.7 koz of gold and 26.8 koz of silver from Ovacık processing plant. Our second processing plant at Mastra has been commissioned in 2009 and has been operating since March 2009. It is currently processing around 480,000-540,000 tonnes per year. In the first six months of 2013 we produced 35.0 koz of gold and 13.2 koz of silver from Mastra processing plant. Our third processing plant, Kaymaz, started production in September 2011. In the first six months of 2013 we produced 54.1 koz of gold and 35.5 koz of silver from Kaymaz processing plant. We produced 154 koz of gold in total in the first six months of 2013, 16,7% lower than the 185 koz of gold in the first six months of 2012.

The temporary decrease in gold production in 2013 resulted principally from the fact that the average processed gold grade at Ovacık and Mastra processing plants has diminished.

Revenues

Our revenues for the first half of 2013, TL 411.8 million, is 26.1% lower than the TL 556.9 million for the first half of 2012. We sold 147.218 ounces of gold in the first six months of 2013 compared to 186.598 ounces of gold in the first six months of 2012, a 21,1% decrease. Attributable production of 154 koz was lower than the first six months of previous year, 185 koz. The average realized price per ounce for gold sold was TL 2,755.12 (\$1,525.08) in the first six months of 2013 compared to TL 2,971.73 (\$1,665.00) in the first six months of 2012. Furthermore, there is 6.648 koz of gold available for sale in our stock as of 30 June 2013.

Cost of sales

Our cost of sales increased by TL 26.4 million or 25.0% to TL 131.9 million from TL 105.5 million in the first six months of 2013. Royalty costs decreased by TL 3 million, to TL 11 million in the first six months of 2013 from TL 14 million in the first six months of 2012. The royalty costs decreased because of diminishing production in 2013 and declining gold prices. Staff costs increased by TL 4.5 million, or 34.6 % to TL 17.7 million in the first six months of 2013 from TL 13.2 million in the first six months of 2012. This increase was mainly attributable to additional employees hired by us to Himmetdede which is newly being developed, to additional employees for Çoraklıktepe and Söğüt in connection with the commencement of operations at our open pits, to more workers hired for Kaymaz and Çukuralan mines because of the increased production and to a lesser extent an overall increase in wages which was generally in line with inflation. Direct material costs decreased by TL 0.6 million, or 4.7 % to TL 15.4 million in the first six months of 2013 from TL 14.8 million in the first six months of 2012. Maintenance costs decreased by TL 0.6 million, or 5.7 % to TL 11.3 million in the first six months of 2013 from TL 11.9 million in the first six months of 2012. Utilities increased by TL 3.2 million, or 52.4 % to TL 9.5 million in the first six months of 2013 from TL 6.3 million in the first six months of 2012. Increases in energy expenditures has been mainly due to the escalating unit prices of energy in 2013.

Cash cost was 880 TL (US\$487) per ounce in the first six months of 2013, and 607TL (US \$339) per ounce in the first six months of 2012. The reason of this increase is mainly because of the rising of cost elements due to inflation and the temporary production decrease according to the lower processed gold grade.

Selling and Marketing Costs

Our selling and marketing costs decreased by TL 0.18 million or 18.4% to TL 0.80 million from TL 0.98 million in the first six months of 2012. The reason of this decline is mainly because of the decrease in sales figures.

General Administrative Expenses

Our general administrative expenses increased by TL 8.4 million, or 32.1% to TL 34.7 million in the first six months of 2013 from TL 26.3 million in the first six months of 2012. Our personnel costs increased by TL 2.7 million, or 23.7 % to TL 14.3 million in the first six months of 2013 from TL 11.6 million in the first six months of 2012.

These increases are mainly because of the expanding production facilities throughout the Turkey and escalating personnel and other cost elements.

Exploration Costs

Exploration costs decreased by TL 3.9 million, or 23.2 % to TL 13.2 million in the first six months of 2013 from TL 17.1 million.

Net Profit for the Period

As a result of the foregoing, our net profit for the first six months of 2013 decreased by TL 105.7 million, or 30.5% to TL 241.6 million from TL 347.3 million in the first six months of 2012. Our profit margin for the first six months of 2013 decreased to 58.7% from 62.4% in the first six months of 2012. This is mainly because of the decrease in production (2013 6m: 154koz, 2012 6m: 185koz) and gold price decrease (2013 6m: \$1,525.08/oz –2012 6m: \$1,655.00/oz) in 2013.

Capital Expenditures

We primarily incur capital expenditures to build new mines and processing plants, expand, upgrade and improve existing mines, processing plants, and related infrastructure, purchase mining and processing equipment to replace aged, inefficient, or obsolete machines and explore our licence areas for new resources. Furthermore, during 2012 we have performed land acquisitions related to Himmetdede project that we are planning to finish construction at 4th quarter of 2013. Our mining and non-mining capital expenditures for the first six months of 2013 are as below with comparison the first six months of 2012. Because construction works and machine and equipment purchases has started in Himmetdede, there is an overall increase in the capital expenditures in 2013.

Thousands of TRY	2013 – 6m	2012 – 6m
Ovacık	1,123	9,274
Mastra	32,005	16,705
Kaymaz	20,313	12,899
Çukuralan	27,487	25,212
Himmetdede	90,859	18,116
Söğüt	1,543	0
Other	5,293	3,981
Total	178,622	86,187

Cash flow

Net cash generated from operating activities increased by TL 85.5 million or 11.7% to TL 813.3 million for the first six months ended 30 June 2013 from TL 727.8 million for the first six months ended 30 June 2012. Earnings before tax decreased by TL 173.9 million mainly because of decreased gold sales resulting from decreased gold production and gold price in the first half of 2013. Our corporate tax for the first six months of 2013 has decreased to 14.5 M TL from 71.8 M TL due to the lower revenue in the first six months of 2013 when compared to the first six months of 2012. The decrease resulted from the lower production and low level of gold prices. (Average gold price for the first six months of 2013 was (TL 2.755,12 - \$1.525,08); average gold price for the first six months of 2012 was TL 2,971.73 (\$1,655.00) Currently, we are financing our capital expenditures from cash that we are generating from operations.

Investment Policy

Exploration activities of the Company consist of exploring new gold and silver deposits, calculating resources by sampling and modelling; and directing the pre-production process for the areas that are economically feasible. Company's exploration team is continuously exploring the potential areas. In case of any positive result, the Company applies for an exploration licence, and the exploration team is sampling and modelling the licenced area. All the samples taken are analyzed by the Company and by the international consultants for resource calculation. If any economically feasible resource deposit is explored, the production is planned by a construction of a new process plant or by processing the ore in the nearest hub.

Dividend Policy

Our company firstly aims to grow in present areas of production and operational facilities, to make strategic investments in new gold fields and to weigh on exploration activities within current exploration licenses. Within this framework, our Company has been targeting to meet all these investments by cash inflow derived from production areas

Within the framework of strategically targets, growth trend, investment policies, profitability and cash status and the provisions of Turkish Trade Act, Capital Market Regulations, Taxation Regulation and relevant clause of our principal contract related to the distribution of profit, Our Company will pay the dividend in the form of cash and/or unpaid shares in minimum proportion of it as basically specified by the Capital Market Board. The dividend, which will be distributed in pursuant to the decision to be taken at General Board meeting may be paid in full or in the form of unpaid shares or be determined to be as partially in cash and unpaid shares.

In parallel with the profit distribution policy of the recent years, it is always possible for the Board of Directors to decide proportion of profit distribution to be above the minimum ratio and submit this to the General Board for the approval.

Payments of dividend will be effected within the legal period based on the articles of associations and the decisions taken at the General Board Meeting which was held on 10 May 2013.

Financial Risk Management

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, existing and prospective debt requirements, the Group treasury aims to maintain flexibility in funding by keeping committed credit lines available. The ability to fund the existing and prospective debt requirements is managed by maintaining the availability of adequate committed funding lines from high quality lenders.

In addition, the Group's liquidity management policy involves projecting cash flows, considering the level of liquid asset, monitoring balance sheet liquidity ratios against the budgets, maintaining debt financing plans. Cash flow forecasting is

performed for each operating mines and aggregated by the Group treasury and finance. Such forecasting takes into consideration the Group's financing plans.

Foreign exchange risk

As the Group's trade receivables are mainly denominated in USD, foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency that is not the Group's functional currency. The price in global gold market predominately is USD which also exposes the Group to the foreign exchange risk. The Group is exposed to foreign exchange risk through the impact of rate changes on translation into TL of foreign currency denominated assets and liabilities. These risks are monitored by analysis of the foreign currency position.

Price risk

The main operational risk is derived from gold price risk. Gold price risk arises from the risk of an adverse effect on current or future earnings resulting from fluctuations in the price of gold. The profitability of the Group's operations, and the cash flows generated by those operations, are affected by changes in the market price of gold, such that a fall in the price of gold relative to the Group's operating cost of production for any period may lead to a decrease in operational profitability of the Group. The Group does not anticipate that prices in global gold markets will decrease significantly in the foreseeable future, and therefore, has not entered into derivative or other contracts to manage the risk of a decline in prices in global gold markets. Furthermore, the Group reviews its outlook for the market prices regularly in considering need for active financial risk management. This risk is closely monitored by analysis of the prices in global gold markets.

Interest rate risk

Borrowings issued at variable rates and other interest bearing liabilities expose the Group to cash flow interest rate risk which is partially offset by interest bearing assets. The interest rate risk is partially managed through the balancing of assets and liabilities that are responsive to the fluctuations in interest rates.

Credit risk

Credit risk arises from cash and cash equivalents, deposits in banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions. Risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. As the Group sells the dorés to only refineries, one in Turkey other in Europe, with a maturity of less than one month, the credit risk for the Group is very low. The Group management, in line with the past experiences, there were never defaults or delays in payments, thus, believes that the credit risk is well managed and monitored effectively and credit risk is limited to carrying amounts of the financial assets.

Incentives

The Province of Gumushane where Mastra Gold Mine is situated has been one of the provinces which are covered under Investment and Employment Incentive Act 5084. We also benefit from Employer incentive premium applied within the same Act.

For our workplaces other than Gumushane, we also benefit 5% employer premium incentive based on the Act 5510.

Incentive certificates, by which we benefited from reduced corporate tax in the year 2013 are as follow:

As 10% of the investment has been completed as at 31.12.2010 for investment granted with Incentive Certificate at Çukuralan, contribution rate to investment is 20% and corporate tax reduction rate is 50%.

The Incentive Certificate for Kaymaz Capacity Increase has been granted by the Ministry of Economy. As 10% of the investment will be completed as at 31.12.2013, contribution rate to investment is 40% and corporate tax reduction rate is 80%.

New incentive certificate applications have been made for Himmetdede project and Çukuralan (for capacity increase and modernization in Çukuralan.)

In addition to the above mentioned incentive certificates, the Company has been working on the new incentive certificates within "Decree on Investment Grants by State" which came into force on 15 June 2012 by decree of the Cabinet of Ministers no:2012/3305.

Events after date of Balance Sheet

No further events have taken place.

Changes in the Articles of Association

The Company's Board of Directors has taken a decision at their meeting held on 18.03.2013 to make following amendments on the articles of association

- Article 3 titled "Purpose and Scope",
- Article 4 titled "Head Office and Branches of Company"
- Article 6 titled "Capital and Type of Shares",
- Article 7.2 titled "Corporate Management Committee",
- Article 10 titled "Auditors and Duties thereof",
- Article 11 titled "General Assembly",
- Article 12 titled "Attendance of a Government Commissioner at Meeting",
- Article 13 titled "Announcement",
- Article 14 titled "Accounting Period",
- Article 15 titled "Determining and Distributing of Profit",
- Article 16 titled "Reserve Fund",
- Article 17 titled "Termination and Dissolution Company"

BALANCE SHEETS**AT 30 JUNE 2013 AND 31 DECEMBER 2012**

(Amounts are expressed in thousands of Turkish Lira ("TL") unless otherwise indicated)

	30 June 2013	31 December 2012
ASSETS

Operational Review

- 185 koz gold production in the first six months of 2012, 154 koz gold production in the first six months of 2013.

We currently own six operating mines: an Underground mine at Ovacık, a mine at Mastra where we utilise both underground and open pit mining methods, a mine at Çukuralan where we utilise both underground and open pit mining methods and an open pit mine in Kaymaz. Open pit production at Söğüt and Çoraklıktepe mines has been started in the first quarter of 2013. The ore from Çoraklıktepe open pit has been transferring to Ovacık process plant. The first party of this ore was processed in May 2013. Himmetdede project construction has started in 4th quarter of 2012. Our mining operations at Küçükdere, an open pit mine located 80 km from the Ovacık Mine, completed in March 2010. Rehabilitation works has been completed and the area has been returned to Ministry of Forestry.

As feasibility, we have Mollakara Project near city of Ağrı which is in the North east of Turkey. In addition to this, and within our own properties, we have 14 projects ranging from early developed to exploration stages with resources estimates have been completed. We are currently focused on developing our resources in the exploration areas at Ovacık, Mastra, Kaymaz, Çukuralan, Himmetdede, Söğüt, and Diyardin.

Mining Operations

Ovacık

The Ovacık mine is located near Ovacık village in western Turkey, approximately 100 km north of İzmir. It is an underground complex. Material from the open pit operation was depleted in September 2007. The open pit has been partially backfilled and no further production is currently planned. The current underground ore reserves give operations at Ovacık an expected lifespan through the end of January 2018; however drilling is currently being undertaken with the aim of increasing the ore reserve at depth to extend the mine life.

The table below presents an overview of our mining operations at the Ovacık mine:

	2013 Jan-Jun	2012 Jan-Jun
Ore mined (t)	78.605	86.711
Underground (t)	78.605	86.711
Au average head grade (g/t)	3,59	5,00
Ag average head grade (g/t)	2,32	4,44

The table below presents an overview of our processing operations at Ovacık (including processing ore from Çukuralan and Çoraklıktepe):

	2013 Jan – Jun	2012 Jan – Jun
Ore milled (t)	426.990	430.672
Recovery rate, Au %	95,17%	95,04%
Au Grade (g/t)	5,02	5,35
Au poured (oz)	64.734	70.549
Ag poured (oz)	26.875	29.363

The Ovacık processing plant is our regional processing hub for ore located in the Ovacık area. It is currently operating mainly on feed from the Çukuralan ore stockpile along with some materials from the Ovacık underground and Çoraklıktepe open pit. Ore production at Çukuralan project's open pit and underground site commenced in the last quarter of 2010 and in August 2011 respectively.

Mastra

Our mining operations at Mastra are located 80 km south of the Black Sea, in northeastern Turkey. Mastra comprises both open pit and underground mining operations. Mining operations at the Mastra main open pit was completed in December 2011. New open pit activities have been started in 2012. In 2012, second underground mining operation started with an underground contractor.

The table below presents an overview of our mining operations at the Mastra mine:

	2013 Jan-June	2012 Jan-June
Ore mined (t)	210.233	99.068
Open pit (t)	52.257	3.426
Underground (t)	157.976	95.642
Au average head grade (g/t)	6,05	6,52
Ag average head grade (g/t)	5,67	4,50

The table below presents an overview of our processing operations at Mastra:

	2013 Jan-June	2012 Jan-June
Ore milled (t)	249.159	258.441
Recovery rate, Au %	92,79%	93,37%
Au Grade (g/t)	4,77	8,21
Au poured (oz)	35.047	64.162
Ag poured (oz)	13.157	10.481

Plant throughput is currently around 40,000-45,000 tpm.

Çukuralan

Çukuralan is in the Ovacik area and is located approximately 40km northwest of the Ovacik mine. This exploration property is low sulfidation, epithermal gold vein system. Since 2005, we performed extensive work on the project, including detailed mapping, stream sediment and soil sampling, resulting in identification of a vein system. Open pit mining ore at Çukuralan started in last quarter of 2010. Underground activities started on February 2011 and ore production began on August 2011. The ore is transported 40 km on trucks to the Ovacik processing plant. The project Environmental Impact Assessment(EIA) report was issued in September 2009 and the relevant EIA affirmative certificate has been granted to begin deforestation of the pit area. We are following the Küçükdere model for grade control, contract mining and stockpile management.

	2013 Jan-June	2012 Jan-June
Ore mined (t)	310.838	405.917
Open pit (t)	237.815	343.570
Underground (t)	73.023	62.347
Au average head grade (g/t)	5,74	5,13
Ag average head grade (g/t)	3,28	2,66

We are transporting high grade and run-of-mine ores to the Ovacik processing plant based on demand and stockpiling surplus low grade material for processing at a later date. The current production schedule is based on a 50,000 tpm total mining rate with a stripping ratio of 13:1 (waste:ore). Also, 16.000 tpm production is planned from underground operations.

Kaymaz

The Kaymaz project is located in north western Turkey, approximately 150 km from Ankara. The Kaymaz deposits comprise a number of different mineralisation styles, including manto-type mineralisation, quartz stock works, quartz veinlets and episodic brecciation adjacent to the granite dike. Open Pit mining at our Kaymaz Project started in March 2011. Kaymaz operation has 4 different open pit areas, that are Damdamca, Mainzone, Mermerlik and Kızılağıl. The construction of our third processing plant at Kaymaz has been completed and test production has commenced in September 2011. We have elected to use a processing plant flowsheet and design almost identical to those installed at Ovacık and Mastra. It is envisaged that after the test period the Kaymaz processing plant will be able to process around 50 tph and this will result in an annual nominal treatment rate of around 400,000 tpy. We are currently targeting gold recoveries of around 88.0%.

The table below presents an overview of our mining operations at the Kaymaz mine:

	2013 Jan-June	2012 Jan-June
Ore mined (t)	342.176	209.089
Open pit (t)	342.176	209.089
Au average head grade (g/t)	7,22	7,98
Ag average head grade (g/t)	6,91	6,48

The table below presents an overview of our processing operations at Kaymaz:

	2013 Jan-June	2012 Jan-June
Ore milled (t)	244.396	234.537
Recovery rate, Au %	85,27%	87,78%
Au Grade (g/t)	7,98	7,71
Au poured (oz)	54.055	50.293
Ag poured (oz)	35.533	36.639

Söğüt

About 70.000 tonnes of ore trial pit production will be done in Söğüt project in 2013. According to this plan, open pit trail production has started in March 2013 and it is expected to be completed until the end of 2013. Ore will be transferred to the Kaymaz site and will be processed at Kaymaz mill.

The table below presents an overview of our mining operations at the Söğüt mine:

	2013 Jan-June	2012 Jan-June
Ore mined (t)	49.171	-
Open pit (t)	49.171	-
Au average head grade (g/t)	4,85	-
Ag average head grade (g/t)	1,38	-

Çoraklıktepe

Çoraklıktepe open pit production has started in March 2013 and it is expected to be completed at the end of 2013. Planned production will be about 151.000 tonnes of ore and about 45.000 oz Au. The ore is being transferred to the Ovacık site and started to be processed at the Ovacık mill.

The table below presents an overview of our mining operations at the Çoraklıktepe mine:

	2013 Jan-June	2012 Jan-June
Ore mined (t)	166.213	-
Open pit (t)	166.213	-
Au average head grade (g/t)	5,74	-
Ag average head grade (g/t)	6,96	-

Construction Projects

Himmetdede

The Himmetdede project was discovered by Koza. The property is identified as thrust related low sulfidation epithermal mineralization. Drilling works are underway for testing the proven areas which were found by geophysical methods carried on the region. All of the required technical performances and ensuring the permits have come to an end. Also, open pit production equipments have been ordered.

Operations for possible ore enrichment methods on gold extraction according to the deposit's tenor and mineralogy are still in progress. As in Mollakara project, Himmetdede project will also have a central processing plant to cover nearby deposits. In 2010, first phase operations of the rock mechanics for Himmetdede Project has been completed. Required metallurgical tests and process designing have been completed by McClelland company in USA. The pre-feasibility works of the Heap Leach facility has been completed by SRK, and final phase design studies are in progress. The EIA report has been granted in March 2012 and about 90% of the land acquisitions have been completed. As a result of the detailed prefeasibility performances, which were prepared by Koza and approved by SRK, Himmetdede reserve studies were completed in December 2012.

The anticipated reserve quantity is 27 million tons of gold mine ore, an average of 0,68 g/t gold grade and an estimation of 583.000 ounces of gold. Process plant and leach pad constructions started in 4th quarter of 2012 and construction is expected to be finished in 4th quarter of 2013.

Himmetdede ore deposit offers very suitable conditions in terms of its location, land conditions and logistic capabilities and other mining activities.

Feasibility Projects

Mollakara

The Mollakara Project is approximately 55 km southeast of Ağrı adjacent to the village of Mollakara and is located in Diyadin area in Eastern Anatolia. The Mollakara Project was held by Newmont between 2005 and 2008 but now it is fully held by Koza. Mineralisation at Mollakara is both structurally and lithologically controlled. This project is made up of two regions which are oxide and sulfate.

This is currently a focus for our exploration activities at Mollakara because there is a huge amount of expanding and improving potential of this site which is currently constituting most of our reserves. Even with the recent explorations, the ore quantity in the area is still not certain. That basically means the deposit may be suitable for expanding on every side. Exploration at Mollakara will include deeper drilling, additional mapping and resource modeling.

Depending on the grade and mineralogy of the deposit, heap leaching is likely to be used for gold extraction. We plan to set up heap leach facility at Mollakara to serve as a central processing plant for other nearby deposits as well. We have already started the works on Mollakara project including pre-feasibility. The works carried out by SGS and the first stage of rock mechanics were completed.

At the end of 2012, Mollakara oxide reserve studies have been completed. Calculated reserve is 14,9 mt @ 0,78 g/t Au and 0,20 g/t Ag and containing gold is 373.000 oz.

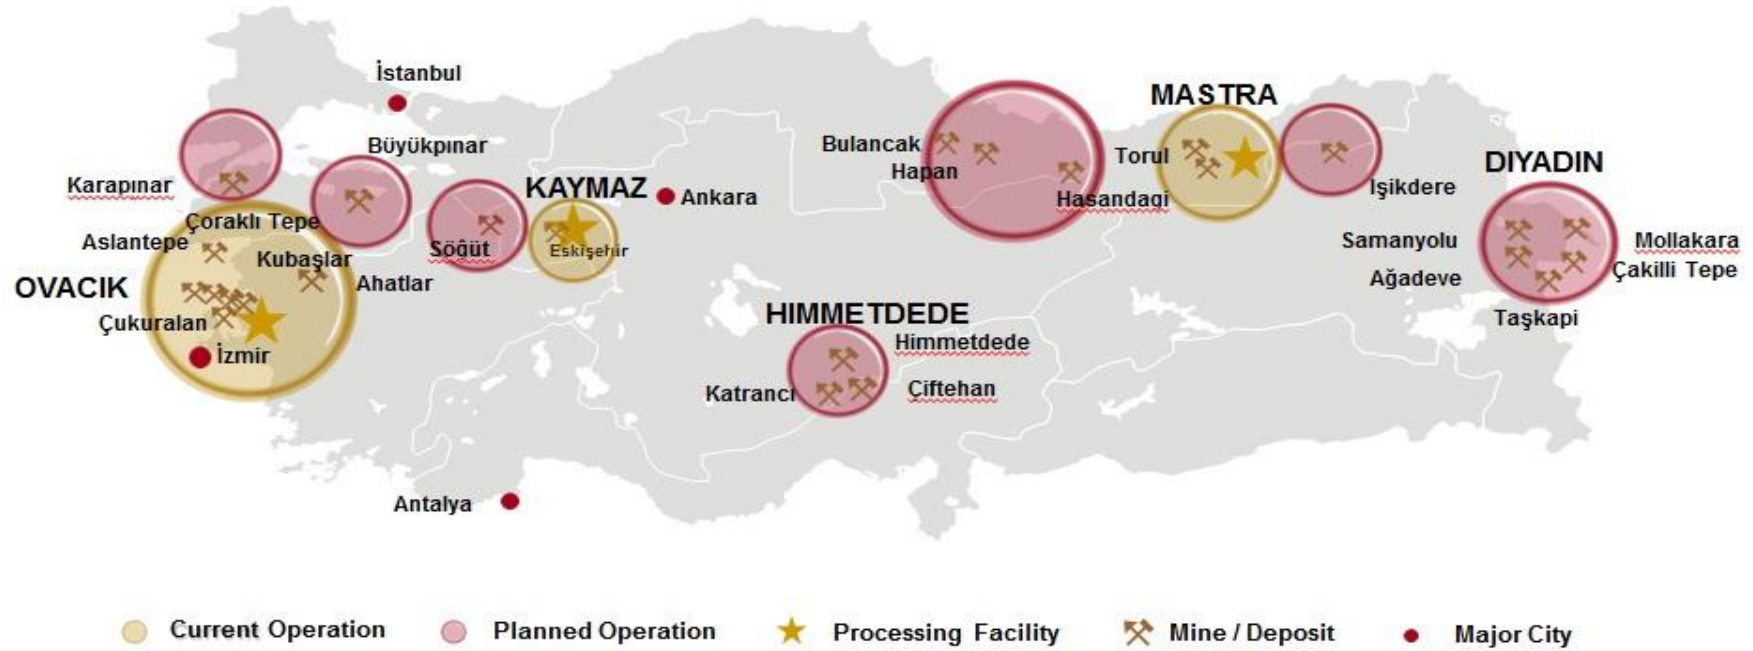

Reserves and Resources

As 30 June 2013, we had 52 operating licences and 411 exploration licences throughout Turkey in the Aegean and Marmara regions, the Black Sea region and Central and Eastern Anatolia.

We have a feasibility stage project, Mollakara, located near Ağrı in the north-east of Turkey. In addition our properties also include 14 exploration projects in Turkey, ranging from early-stage to advanced exploration prospects with resource estimations completed in 2009. At most of our exploration prospects, mapping and sampling programmes are ongoing or completed and drilling and geophysical surveys have already commenced or are planned for 2012. Currently our exploration activities are focused on the expansion of resources surrounding our current and planned mining operations in Ovacık, Mastra and Kaymaz mine areas and in the Diyadin and Himmetdede exploration areas.

As a result of acquisitions and exploration activities, from our inception in March 2005 to 31 December 2011 our total gold resource base increased more than sixfold to 12.6 million ounces from 1.3 million ounces. Over the same period, our total reserve base increased to 3.7 million ounces from 0.4 million ounces, also benefiting from increasing gold prices. Almost half of the resources consist of inferred material. Therefore, Koza is planning to utilize 8 rigs during the year to continue exploration programme and to convert the inferred resources into the higher confidence categories of measured and indicated allowing economic assessments to be made on the resources.

- ☺ A Hub strategy = a central processing plant, surrounded by satellite mining operations
- ☺ A Hub strategy is central to Koza Gold achieving its production and resource objectives
 - Enables profitable acquisition and development of smaller, high-grade deposits, Significantly reduces capital costs
- ☺ Turkey remains largely untapped relative to regions with similar gold resource endowments
 - Combination of high-grade small deposits (e.g. epithermal veins) and lower grade large deposits (e.g. Porphyry)
- ☺ Koza Gold's local operating expertise is a distinct competitive advantage
 - The Ovacık Hub currently has one processing plant with two mining operations.
 - Our second processing plant is in operation at the Mastra Hub.
 - The third processing plant at Kaymaz started production on September 2011.
 - Construction of 4th processing plant Himmetdede was started in 4th quarter of 2012, and production will be commenced in 4th quarter of 2013.
 - 2 other potential areas for hubs have been identified – Diyardin, Hapan.
- ☺ Our current operations are supported by a significant pipeline of development and exploration projects
- ☺ Proven track record of discovering resources, with the intention of continuing to explore our large portfolio and advanced projects

Corporate Governance Report

Corporate Governance Statement

Our Company in principal adopts “Principles of Corporate Governance” accepted by the resolution 35/385 of Capital Market Board on 04 July 2003. Company is aware that implementation of these principles will derive benefit for our company, stakeholders and ultimately our country. Therefore, our Company has initiated implementation of Corporate Governance principles.

SECTION I – SHAREHOLDERS

1. Relationship Unit with Shareholders

Our Company has set up an investor’s relations unit to reach the investors. This section will be operated under the coordination of Okan Bayrak, Assistant General Manager, Investor Relations. It is full-time position for promoting it to domestic and international corporates and individuals, to inform them accurately, fully and correctly, to answer questions immediately. Interviews conducted for a position to assume responsibilities of this section are underway and appropriate candidate will soon be recruited for related position. This section will be available for individual and corporate investors by telephone, fax, e-mail at all times. Any significant developments in connection with company’s business affairs if required will be shared with the public via press releases. It is planned the copies of press bulletins released and presentations shared by the research experts and all documents not in nature of trade secret of the company’s affairs will be available on the internet. This section can be accessed at yatirimciiliskileri@kozagold.com and telephone no: 0312 587 1000 or fax no: 0312 587 1100

2. Right of receiving information of the investors

A section is reserved in the internet website under the heading of “Investors Relations”. Without any prejudice, all information publicly disclosed are available on the website for shareholders who will have easily and equally access to company information. An internal operating system was set up to quickly reply any queries directed to Investors Relations Unit verbally or written within the information disclosed to the public.

3. Information on General Board Meeting

Following decisions were taken at the General Assembly held on 10 May 2013;

1. The Activity Report and Auditor’s Report prepared by the Company’s Board of Directors for the year 2012 were presented to the General Assembly and both reports were accepted by the majority of the votes.
2. The Balance of Statement and Profit/Loss accounts prepared by the Company’s Board of Directors for the year 2012 were accepted by the majority of the votes.
3. Each member of the Board of Directors and the auditors were separately acquitted by the majority of the votes.
4. Discussion was held on the distribution of the profits for the year 2012. Following decisions were reached by the majority of votes :

- to pay shareholders first cash dividend gross 131,208,653.84 TL and distribute cash dividend of net 38,590,780.54 TL to the members of the Board of Directors, elected to represent Group A,

- to set aside the amount of 16,217,443.44 TL as 2nd Tranche legal reserve and the amount of 456,107,569.01TL as the extraordinary legal reserve fund and,

- to set the commencement date to be 14.05.2013 for distribution of dividends.

5. It was accepted by the majority of votes that Hamdi Akin İpek, Cafer Tekin İpek, Melek İpek and Pelin Zenginer to hold offices for a period of 3 years and in addition to them, İsmet Kasapođlu and Yusuf Kyuce to be elected as the independent members to the Board of Directors for a period of 1 year and election of İsmail Kkbulut and Enver İman to serve as the members of the Auditing Committee for one year each.

4. Voting Rights

The holders of Group A shares have right of privilege to nominate candidates for the Board of Directors and Auditor.

5. Profit Distribution Policy

Our company firstly aims to grow in present areas of production and operational facilities, to make strategic investments in new gold fields and to weigh on exploration activities within current exploration licenses. Within this framework, our Company has been targeting to meet all these investments by cash inflow derived from production areas

Within the framework of strategically targets, growth trend, investment policies, profitability and cash status and the provisions of Turkish Trade Act, Capital Market Regulations, Taxation Regulation and relevant clause of our principal contract related to the distribution of profit, Our Company will pay the dividend in the form of cash and/or unpaid shares in minimum proportion of it as basically specified by the Capital Market Board. The dividend, which will be distributed in pursuant to the decision to be taken at General Board meeting may be paid in full or in the form of unpaid shares or be determined to be as partially in cash and unpaid shares.

In parallel with the profit distribution policy of the recent years, it is always possible for the Board of Directors to decide proportion of profit distribution to be above the minimum ratio and submit this to the General Board for the approval.

According to the decisions taken at the General Board Meeting on 10 May 2013, payments of dividend will be distributed within the legal period to the members of the board representing Group A shareholders for the Company's performance, if net term profit as the result of Company's 2012 activities according to financial report prepared by IFRS is,

- under 400 million TL, 2% of net distributable profit;
- between 401 million TL and 450 million TL, 3% of net distributable profit;
- between 451 million TL and 500 million TL, 4% of net distributable profit;
- over 500 million TL, 5% of net distributable profit.

6. Transfer of Shares

Clause 6 of the Company's Articles of Association states: "Transfer of share certificates of the company is allowed provided that the provisions of Turkish Trade Code, Capital Market legislation and these articles of association are reserved".

SECTION II - PUBLIC DISCLOSURE AND TRANSPARENCY

7. Company's Information Policy

Koza Gold will observe and fulfill corporate governance principles mainly Capital Market Act and the arrangements related with this legislation and all kinds financial information and other explanations and announcements and generally accepted accounting principles within frameworks of Turkish Trade Act and its related procedures and follow a detailed Information and Public Disclosure Policy within this scope.

Basic aim of information policy is to ensure shareholders, employees, customers, creditors and stakeholders are disclosed information and explanations, not in the nature of trade secret, through easily accessible at low cost, accurate, complete, comprehensible at equal condition.

In connection with all practices of public informing, it complies with Capital Market procedures and arrangements of ISE and aims to implement most effective communication policy within CMB Corporate Governance Principles.
